

K&L MC600 HEAVY DUTY LIFT

K&L Supply proudly offers this top of the line lift with the quality features that a professional service shop demands.

The dual cylinder design ensures smoother lifting action on bikes weighing up to 1100 lbs. The four working positions of 6, 11, 21, and 27 inches allow your technician to place the work at the right height, every time.

A 17" removable panel is standard with the MC600; this allows easy access to the rear wheel, even on full dress models. Other features include a heavy duty diamond plate steel work surface that resists center stand bowing, and a loading ramp that can be mounted to the rear of the lift. Tie down attachments and a baked epoxy finish round out the standard equipment package on this lift.

- K&L designed, incorporating the highest quality features and materials for a long and trouble free service life.
- Loading ramp can be mounted to either end of the lift.
- Lift automatically locks at three separate positions
- One year warranty.

35-9003 MC600 Lift, blue diamond plate. *Note: Vise not included with lift.*

MC500 LIGHT DUTY LIFT

Introducing the MC500 light duty lift, the newest addition to the K&L family of lifts. Designed for use on lighter motorcycles, the MC500 doesn't require compressed air, or electric power. The foot operated pump mechanism makes it perfect for use in a home garage, or transport to the racetrack! With a maximum lift capacity of 600 lbs, this lift is ideal for sport bikes, dirt bikes, and scooters.

Call your sales rep for details, or visit the K&L web site for a demonstration. Shown with optional Deluxe wheel clamp.
