

K&L MC600 HEAVY DUTY LIFT

K&L Supply proudly offers this top of the line lift with the quality features that a professional service shop demands.

The dual cylinder design ensures smoother lifting action on bikes weighing up to 1100 lbs. The four working positions of 6, 11, 21, and 27 inches allow your technician to place the work at the right height, every time.

A 17" removable panel is standard with the MC600; this allows easy access to the rear wheel, even on full dress models. Other features include a heavy duty diamond plate steel work surface that resists center stand bowing, and a loading ramp that can be mounted to the rear of the lift. Tie down attachments and a baked epoxy finish round out the standard equipment package on this lift.

- K&L designed, incorporating the highest quality features and materials for a long and trouble free service life.
- Loading ramp can be mounted to either end of the lift.
- Lift automatically locks at three separate positions
- One year warranty.

35-9003 MC600 Lift, blue diamond plate.
Note: Vise not included with lift.

- 00-7843 Video Demonstration
- 35-9251 Replacement Foot Control Air Valve
Comes with air line fitting and plunger rod
- 37-9018 Cylinder Repair Kit-(seal only)

K&L MC15 CYCLE DOCK

The MC15 Cycle Dock clamp allows one person to load and unload a motorcycle in a trailer, pickup truck or on a service lift. The pivot mechanism uses the weight of the bike to hold itself upright, leaving allowing your hands free to secure the bike. It is simple in design and ruggedly built to last for a long time. Use the mounting rails that are supplied to mount the Dock into a trailer or pickup truck. The rails mount to the deck so you can slide the Dock out leaving just the mounting rails behind, this frees up your truck or trailer for other uses. The kit comes complete with two rockers (wide and narrow), Cradle stop (upright), mounting plate, the support arm (with eyelets and adjustable feet) and two mounting rails. UPS shippable. Note: Tie-Downs recommended.
